

9.Heater kit : HHC10W

1) Purpose

Heat an engine room, which facilitates the smooth start of the engine even in areas where the temperature is low.

2) Specification

Item		Standard specification	Specification for cold region
Minimum ambient temperature		23°F (-5°C)	5°F (-15°C)
Coolant	Type	Cogeneration coolant L201	
	Concentration	50%	60% (coolant change)
Drain heater		Not provided	250W×2 (under the generator)
Block heater		Not provided	200W×1 (In the middle of the coolant piping inside the unit)

3) Circuit diagram
